**Subject:** OR CZARA -- EPA's decision document

Peter, this email is in follow-up to the voicemail I left you yesterday. We at EPA and NOAA would like to meet with the State to go over EPA and NOAA's decision document and provide you and your staff the opportunity to ask questions and get clarification if needed. We think it would be useful to understand your perspective on the State's intentions/plans to address the issues identified in the decision document. Our current thinking is that the State intends to address the gaps EPA/NOAA identified and it would be good to hear/understand the State's thinking on that matter.

We are looking at potentially having such a meeting in Portland if that works for you and your staff. In terms of timing, late March or early April works for us. I have asked Jayne Carlin (206-553-8512) of my staff to work with your staff to coordinate and make plans for such meeting. If you agree that it makes sense for us to meet, please let me and Jayne know who your point person is. Might it be Kyle Abraham who my staff is already working with?

Thanks and let me know your interest in meeting with EPA and NOAA.

Christine Psyk, Associate Director  
EPA Region 10, OWW
